

# **ROLE OF ENORMOUS CHANGEABLE EARTH MAGNETIC FIELDS (CEMF) INTENSITIES IN ETIOPATHOGENESIS OF MENTAL DISTURBANCES AND ILLNESSES (MDI)**

Nikola Trifunovic\* Ing. geofizike

## **SUMMARY**

Aim of this paper is contribution to mental disturbances and illnesses etiopathogenesis appeared under the influence of enormous changeable Earth magnetic fields intensities and explanation of central nervous system (CNS) operation from knowing the effect of natural physical fields on evolution of living world and central nervous system operation aspect. Correlation between enormous changeable Earth magnetic fields and mental disturbances and illnesses was determined. Effect of enormous changeable Earth magnetic fields zones upon central nervous system had been revealed, and then the patient was moved away from the enormous zones influence. Synthesis of two data groups was made. Processing the first data group correlation between present enormous changeable Earth magnetic fields zones and central nervous system of the patient was determined. The second data group is a theoretical explanation of unclearness found in literature concerning central nervous system from knowing the changeable Earth magnetic fields aspect. Coincidence of the practical measuring results and theoretical explanations of almost all unclearness from the literature on central nervous system was determined.

It was concluded that enormous changeable Earth magnetic fields are the main cause of mental disturbances and illnesses appearance and that moving the diseased away from enormous zones is a great help to the patient and his doctor in treatment.
