

DOPRINOS ZEMLJINOG MAGNETNOG POLJA U DEOBI ĆELIJA I EVOLUCIJI BIOSVETA I TEORISKO OBJŠNJENJE NASTANKA TUMORA (BENIGNOG I MALIGNOG)

Nikola Trifunović, dipl.ing.geofizike
Južni Bulevar 32, Beograd

SAŽETAK

Ovaj originalni rad objašnjava da su magnetne i elektromagnetne sile u ćelijama rezultujuće vektorske veličine makrozemljinih magnetnih polja i mikro magnetnih - elektromagnetnih polja iz ćelija.

Ukazano je na nedostatak biološke nauke koja ne proučava doprinos Zemljinog magnetnog polja evoluciji živog sveta na Zemlji.

Zemljino magnetno polje omogućava podelu majke ćelije na dve kćeri ćelije, tj . promotor podela ćelija je prirodno Zemljino magnetno polje. Da je ovo tačno potvrdili su i ruski eksperimentalni radovi , dokazavši da fetus ugine u nultom Zemljinom magnetnom polju.

Objašnjen je nastanak Crossing overa, dokazom da je Zemljino magnetno polje omogućilo razmenu gena na homologim segmentima hromosoma i to u pravcu sever - jug i istok –zapad.

Podivljala ćelija koja se neograničeno puta deli je maligna ćelija uništava organ a zatim i organizam. Maligna ćelija nastaje isključivo u neprirodnim Zemljinim magnetnim poljima (anomalijskim priraštajem), a koji su proizvod veštačkih magnetika u boravišnim prostorijama ljudi. Objasnjeno je zašto je Crossing over zastupljen kod tumora. Takodje je dato objašnjenje kako i zašto je ćelija tumora večito živeća ćelija.

Na osnovu teoretikog objašnjenja nastanka tumora smatramo da je geneza raka rešena.

EARTH MAGNETIC FIELD IN CELLS DIVISION AND EVOLUTION, THEORY OF TUMOUR EMERSION

Abstract

The original work explains that magnetic and elect- magnetic forces in cells are resulting vector quantities of Earth macro-magnetic fields and micro-magnetic-electromagnetic fields from cells. It has, also, been pointed too a deficiency in biological science, witch does not study the contribution of Earth magnetic field (EMF) in the evolution of living world on this planet. EMF enables division of mother cell in into two doughter cells, i.e the promoter of the cell's division is the natural EMF. That the above statment is true was proven by Russian experiments which showed that fetus perished in zero EMF.

The origin Crossing-over has been explained, i.e. the EMF enables the exchange of genes on the homologous chromosome segments in north-south and east-west directions.

A rampaged cell, dividing itself endlessly is a malignant cell and it destroys an organ and then the entire organism. This malignant cell appears only in unnaturale EMF, (anomalous increase), as a product of artificial magnetics in the peoples dwelling spaces.

It has been expalnted why Crossing-over occurs with tumours. It has, also, been explained how and why tumour cell is an everliving cell.

On the basis of the tumour apperance theoretical explanation, we think that the cancer genesis has been solved.

Key Words:EMF, cells division, Crossing-over, evolution, theory of tumour.
